Aaryan Tiwari

Lead GenAI Engineer

taaryan.official@gmail.com | Ph: 7488372401 / 9664387116 | Portfolio: tiwariaaryan.github.io

PROFESSIONAL SUMMARY

Lead GenAI Engineer with 5+ years of experience in Machine Learning, Deep Learning, Generative AI, and Data Science. Skilled in building end-to-end AI solutions using LLMs, RAG, NLP, agentic workflows, and cloud-based deployment. Proven track record of leading 20+ AI engineers and delivering scalable GenAI platforms with Claude, Gemini, FastAPI, Docker, and Kubernetes.

EDUCATION

Bachelor's Degree – Jaipur Engineering College and Research Center
2017 – 2021

CORE EXPERTISE

Agentic AI **Machine Learning** **Deep Learning** **RAG Pipelines**
Prompt Engineering **NLP** **Statistical Modeling** **Data Mining**
LLM Orchestration **Feature Engineering** **Data Visualization** **AI Automation**

TECHNICAL SKILLS

Python **LangChain** **Scikit-learn** **TensorFlow/PyTorch**
REST APIs **FastAPI** **Docker** **Kubernetes**
SQL/MySQL **Cloud Platforms (AWS/GCP)** **Streamlit** **Git/CI-CD**

PROFESSIONAL EXPERIENCE

Lead AI Engineer – Introlligent

Oct 2024 – Present | Bengaluru, India

- Leading development of enterprise AI platforms focused on Machine Learning, Deep Learning, Generative AI, and LLM-powered automation systems. Managing 20+ AI engineers.
- Designed AI evaluation pipelines using statistical techniques, data mining, and LLM-based scoring for response grounding and semantic validation.
- Built scalable FastAPI microservices for async AI processing, batch evaluations, and end-to-end AI solution deployment on cloud platforms.
- Architected AI infrastructure integrating Claude and Gemini APIs with enterprise systems, following software engineering best practices.
- Directed containerized deployment using Docker and Kubernetes for production-grade AI services.

PE-AI-PLATFORM

- **MCP Orchestration Layer: Built orchestration systems exposing 23+ enterprise APIs for autonomous, end-to-end AI workflows.**
- **Grounding Engine: Developed factual and semantic validation systems using NLP, statistical analysis, and Claude/Gemini APIs.**
- **AI Evaluation Platform: Created LLM-as-a-Judge systems with large-scale experimentation for response evaluation and benchmarking.**
- **Synthetic Data Generation: Built data generation pipelines using feature engineering and data mining for evaluation workflows.**
- **QA Automation: Automated UAT test case and RTM generation using LLM-powered requirement extraction.**

AI/ML Engineer – Ernst & Young (EY GDS)

Feb 2022 – Jul 2024

- Led Generative AI and Data Science initiatives focused on LLM applications, NLP, ML model development, and workflow optimization.
- Designed RAG-based AI applications using LangChain, vector databases, and enterprise retrieval systems.
- Developed scalable AI services integrating ML models, deep learning, and data analysis pipelines for enterprise automation.

Key GenAI Projects

- **Text-to-SQL: Built LLM-powered NLP solution converting natural language to SQL using Gemini APIs with data mining techniques.**
- **PDF Data Extraction: Developed pipelines using Gemini models and text mining to extract structured data from PDFs at scale.**
- **GenAI POCs: Built AI chat systems using RAG, image analysis using CNN, and similarity search with deep learning embeddings.**

Associate Software Developer – Aapna Infotech Pvt Ltd

Apr 2021 – Feb 2022

- Worked on enterprise workflow management systems, backend automation services, REST API integrations, and data-driven application development.
